Boat handling!!

There are a lot of people (especially new, inexperienced people) trying to handle singles on their own, please try to get help with moving boats, it makes it easier, less hazardous and above all you get to meet people.

Also rowers are leaving singles on the shore unattended while they run their oars up to the shed to be hung. A better solution is to place your oars on the beach, buttons off the sand, and ask someone to help you with them or first take your boat up and then return for the oars.

Two good reasons for this are:

1. The oars will not float away the boat may do
2. If wash comes in or it is windy the boat will bash against the beach and bend the fin

So the best bet is to deal with the boat first then the oars

Thanks to Avon Descent volunteers

Many thanks to the members that put in some time at the Avon Descent. A great revenue raiser for the club and also presents ANA in the community at large. Well done.
